

Stadiums & Arenas

Complete suspension systems for building services and fit-outs

- Flexible and versatile solutions
 - Aesthetically pleasing
 - Time saving installations

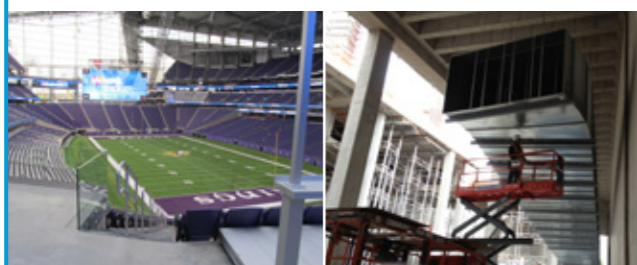

The ideal choice for stadiums and arenas

Gripple products have been used on numerous of stadium and arenas worldwide, with clients, consultants and contractors realising the enormous benefits our innovative suspension systems can bring to often time and cost-sensitive projects. From main MEP systems and interior fit-outs, to signage, acoustic panels and decorations, Gripple offers a range of flexible and versatile suspension systems for a range of applications.

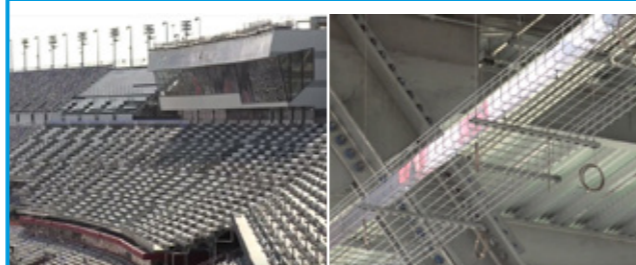

Around the world we have worked closely with clients and consultants to design cost-effective and aesthetically pleasing solutions, which have enabled contractors to spend less time on-site. As a total solution provider, our comprehensive range of products are backed up with knowledgeable sales and in-house technical support which is provided from design through to installation on-site.

US Bank Stadium - Minneapolis, MN
Minnesota Vikings Stadium

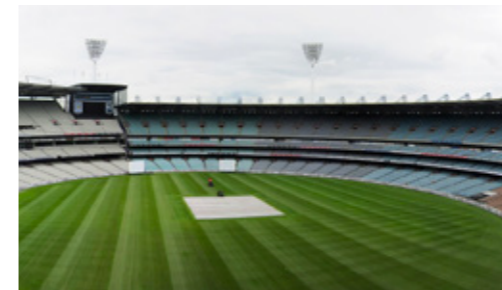

Home to the Minnesota Vikings, Gripple was used to suspend the ducting at the stadium. The duct was very large (365 cm x 195 cm) but the Standard Hanger No. 5 proved to be the ideal solution for this project.

Daytona International Speedway, Daytona Beach, FL

Custom Stainless Steel hangers with Eyelet end fixings and Trapeze No.3 hangers were used to suspend long runs of cable basket for IT and security cabling in an outdoor environment at the world-famous speedway.

Gripple products have been used in a number of stadiums and arenas worldwide including:

- Wembley Stadium, London
- Multiple venues in Queen Elizabeth Olympic Park, London
- Millennium Stadium, Cardiff

USA

- AT&T Stadium, Arlington, TX
- New York Yankees Stadium, NY
- Washington Nationals Stadium, Washington DC

Why Gripple?

Flexible and versatile

A total solution suitable for MEP systems and interior fit-outs, to signage, acoustic panels and decorations

Aesthetically pleasing

Delivers a minimalist look to complement the environment and enables a light, airy, welcoming space to be created where there are open ceilings (black solutions available)

Safe and easy

Less labour intensive and easier installation with no cutting or hot works permits needed

Environmentally friendly

Solutions can contribute to BREEAM & LEED

Time saving

Faster installation than traditional methods meaning reduced time required on site, ideal where there are challenging project timescales with stringent hand-over schedules or fiscal penalties for late delivery of project

Lightweight

Simple-to-store solution that is easy to move around large sites compared to threaded rod, without creating any health and safety concerns
