Construction Product Guide

Products for the suspension of building services
HEATING, VENTILATION, FAN COIL UNITS, CHILLED BEAMS, DUCTWORK, SOLAR PANELS, CONDUIT, AIR CONDITIONING UNITS, MECHANICAL, PIPING, LADDER TRAY, CABLE BASKET, STRIP LIGHTING, HIGH BAY FLUORESCENTS, TROFFER SUPPORTS, Catenaries, Shopfitting, Signage, Acoustic Baffles, Suspended Ceilings, Bracing.
About Gripple

Gripple is an employee-owned company that prides itself on product innovation and a culture of charity and fun. Of the 500-strong Gripple employees working worldwide, over 100 are dedicated to serving North America. Our Territory Managers here are experts in providing suspension solutions for HVAC, Mechanical, Electrical, Lighting, Acoustics, and Signage. And our manufacturing facility and support teams in Aurora, Illinois enable us to offer flexible, centralized service to the US, Canada, and Mexico.

“...Gripple’s capabilities are recognized, admired, and trusted worldwide.”

From contractors to consultants, we offer:

- Material Take Offs (MTO’s) – we’ll advise on what you need and where
- CAD drawings
- Bill of Materials (Gripple product & quantities)
- On-site visits to discuss potential suspension solutions
- Product training – for specific installations or for newest products
- Regular on-site advice until job completion
- Fast product delivery

What we do

Time Savings

Save up to 85% on installation times for your suspended services when you use Gripple’s cable hanger kits, as compared to traditional suspension methods. Not only is the installation faster, no pre-work, such as cutting or filing, is required.

Health & Safety

Gripple cable hanger kits are ready-to-use straight from the box, removing the need for potentially hazardous cutting on site. One box of Standard No.2 cable hanger kits weighs just 17 lbs, doing the same job as 330 lbs of threaded rod and strut. Not only is the weight and bulk of materials to carry reduced, but also the time spent working at heights.

CO₂ Savings

For every foot of Gripple cable specified to replace threaded rod, it is estimated that a savings of 2.7 lbs of embodied CO₂ is realized. This equates to a total embodied CO₂ saving of up to 95% when switching from threaded rod to Gripple cable hangers.

Aesthetics

Gripple cable hanger kits are lightweight and virtually invisible from the ground. Comparing 1/8” cable to 3/8” threaded rod, the difference is easy to see. With a trend towards exposed services, Gripple cable kits enhance the aesthetics significantly, especially in retail environments. We also offer a range of black cable kits ideal for cinemas, theaters and other areas where the ceiling is exposed or painted black (See page 22).
The Gripple® range of supports and hangers for piping applications has been developed to provide a fast and versatile solution for suspending all types of pipe and mechanical installations.

Gripple products are designed to save time & labor and reduce costs by making the installation quick and easy, allowing a contractor to be more competitive by moving onto their next job faster. Supplied in ready-to-use kits, the products in this range require no on-site cutting and eliminate the need for fabricating pipe bracket assemblies, offering enormous health and safety benefits for your project.

Products shown are for internal use only. Images shown for illustrative purposes only. Please refer to product installation instructions for full information.
The Gripple® range of hangers for HVAC applications has been developed to provide a fast and versatile solution for suspending ductwork, heaters, air conditioning, radiant panels, and plenum boxes. Our products are manufactured in the UK and USA, and are designed to save you time and labor costs, thus improving the efficiency of your installation. Unlike traditional suspension methods, Gripple kits do not require cutting or filing. Gripple suspension solutions offer aesthetic design without compromising on strength, and are supplied in ready-to-use kits with a choice of cable length and end fixing.
The Gripple® range of supports and hangers for electrical applications has been developed to provide a fast and versatile solution for suspending all types of electrical containment.

Gripple products are designed to save time & labor and reduce costs by making the installation quicker and easier. Supplied in ready-to-use kits, the products in this range are lightweight, require no on-site cutting, and reduce the time spent working at heights, offering enormous health and safety benefits for your project.
The Gripple® range of suspension solutions for lighting are manufactured in the UK and USA, and have been designed to save you time, money, and labor by improving the efficiency of the installation process. Unlike traditional suspension methods, Gripple kits eliminate on-site cutting or filing, resulting in much better health and safety benefits for your team.

Our products offer a sleek, professional and discreet finish, without compromising on strength, and are supplied in ready-to-use kits with your choice of end fixing and cable length.

Angel has a wide range of feet options available to suit your lighting application. See page 31 for details.

Products shown only for internal use. Images shown for illustrative purposes only. Please refer to product installation instructions for full information.
The Gripple® range of suspension solutions for module applications has been developed to provide fast and versatile solutions for prefabricated building services modules, even those requiring installation in tight, hard to reach places.

Our products are manufactured in the UK and USA, and are designed to save you time and labor costs, thus improving the efficiency of your installation. As a proven method of installation, cable hangers can be pre-installed onto modules on the ground, reducing time from module arrival on site to module installation, and with less risk of damage to the module. As a result, installation time is dramatically reduced compared to traditional methods, with no need for cutting, filing, or bending rod into place.
The Gripple® range of signage hanger products has been developed to provide a complete solution for the suspension of all forms of signage. The variety of kits allows for complete flexibility and adjustability, without the use of additional tools. The product design provides a sleek, professional finish, without compromising on strength.

Our kits have been designed to save you time and labor by making installation quick and easy.

The Gripple® range of signage hanger products has been developed to provide a complete solution for the suspension of all forms of signage. The variety of kits allows for complete flexibility and adjustability, without the use of additional tools. The product design provides a sleek, professional finish, without compromising on strength.

Our kits have been designed to save you time and labor by making installation quick and easy.

Products shown only for internal use. Images shown for illustrative purposes only. Please refer to product installation instructions for full information.
The Gripple® range of hangers for acoustic applications are manufactured in the UK and USA, and have been designed to save you time, money, and labor by improving the efficiency of the installation process. Unlike traditional hanging methods, Gripple kits require no on-site cutting or filing, and offer enormous time-saving benefits for your project.

Gripple products can fit directly into acoustic baffles, panels, and suspended ceilings, offering a sleek, professional, and discreet finish without compromising on strength. All products are supplied in ready-to-use kits with your choice of end fixing and cable length.
Gripple’s ready-to-use suspension kits now come with the option of a black finish to further enhance the aesthetic appeal of the range.

The slim and unobtrusive aesthetics of Gripple’s cable suspension systems have always proved perfectly suited to the design of many modern buildings, either where building services in the ceiling space are left exposed and visible, or for specific applications such as the suspension of lighting.

The new Black Line of products aims to build on this success and will be ideal for use in a wide variety of environments where aesthetics and dark ceilings are prevalent, including retail spaces, theaters, exhibition venues, and concert halls.

Each ready-to-use kit is supplied with a black cable, black fastener, and your choice of black end fixing.

For further information please call 1 866 474 7753 or email grippleinc@gripple.com

Other Applications

Seismic Bracing & Force Protection

Seasonal Decoration (External Cable Strut)

Rooftop Bracing Solutions

Solar Panel Installation
### Standard Hanger

Cable hanger kit containing the original Gripple HangFast fastener, for suspending a variety of HVAC, piping, lighting, and electrical services.

- The only Gripple Hanger available in sizes No.1 thru No.5, with Safe Working Loads from 25 thru 715 lbs per hanger.
- Ideal for fast suspension of any suspended service.
- Up to 6 times faster to install than traditional methods.
- Versatile and simple to use.
- Strong, safe, and industry approved.
- Aesthetically discreet and lightweight.
- Fastener can be released with a Release Key to adjust or level the height of the service.

### Express Hanger

For the fast suspension of a variety of services, designed with an easy push-button release mechanism.

- The Express No.1 is ideal for signage, shopfitting, lighting, and other lightweight fixtures.
- The Express No.2 is ideal for mechanical and electrical services.
- Up to 6 times faster to install than traditional methods.
- Discreet and aesthetic design.
- Ergonomic push buttons are easy to use.
- No Release Key required to adjust or level the service.

Angel Hanger

Designed for architectural lighting suspensions, signage, acoustic baffles, and installations where aesthetics are important.

- Simple one handed operation for easy height/leveling adjustment by pressing in on “wings”
- Contemporary design to complement the overall suspension
- Extensive range of cable end fixing options allowing installation into most structure or ceiling types
- Variety of feet options to enable attachment in different ways
- Uses 1/16” cable to make the suspension as visually discreet as possible

Supplied as ready-to-use kits with a length of cable, Angel fastener, and end fixing of your choice.

Angel Feet Options

The Angel fastener is extremely versatile, with a range of feet options available to suit every application.

Y-FIT
- Dual fixing points for balance
- Ideal for suspending light fixtures
- 6”, 12”, or 18” leg lengths as standard
- Various end fixing options for leg attachment to service

SIGNAGE
- Ideal for signage up to 3/16” in thickness
- Grub screw for direct attachment
- Side cable exit

HOOK
- Ideal for light fittings, signage, or for use with eyebolts, spring, and wire anchors
- Integrated hook with 1/8” clearance
- Safety clasp for security
- Side cable exit

SWIVEL
- Swivel feature for suspension at angles up to 90º
- Available in 1/4” thread
- Female: maximum insertion depth 1/4”
- Male: 9/16” exposed thread length as standard
- Side cable exit

SIDE EXIT FEMALE
- Female threaded foot, ideal for direct attachment to light fittings, frames and acoustic panels
- Available 1/4” thread
- Maximum insertion depth 1/4”
- Side cable exit

SIDE EXIT MALE
- Threaded male foot, ideal for direct attachment to light fittings, frames and acoustic panels
- Available in 1/4” thread as standard.
- 9/16” exposed thread length as standard, custom lengths on request
- Side cable exit

SIDE EXIT MALE
- Available with a range of feet options

LOAD RATING PER HANGER

No.1
33 lbs

* When releasing: 1. Remove load, 2. Squeeze wings, 3. Raise or lower on cable

Supplied as ready-to-use kits with a length of cable, Angel Hanger, and end fixing of your choice.
Stainless Steel Hanger

Used to suspend a variety of mechanical and electrical services in the food industry and high humidity environments.

- Stainless steel body and springs are corrosion resistant and long-lasting
- Ceramic rollers for extra strength and corrosion resistance
- Aesthetically discreet and lightweight
- Stainless steel body and springs are corrosion resistant and long-lasting
- Available in two sizes load rated up to 200 lbs SWL
- Available for use with Loop, 1/4" Stud, Hook, Y-Hook, Toggle, and Y-Toggle end fixings
- Fastener can be released with a Release Key to adjust or level the height of the service
- Like all Gripple hangers, NOT suitable for use in chlorinated or swimming pool environments

Available in sizes No.2 - No.3

Supplied as ready-to-use kits with a length of cable, Stainless Steel fastener and end fixing of your choice.

UniGrip Hanger

Designed for fast suspension of cable containment, piping, ductwork, HVAC systems and modules.

- Enhanced load performance
- Three times lighter than the Trapeze Plus product it succeeds
- Larger button delivers easier, one handed adjustment
- Locking indicator now offers visible certainty
- Ideal for creating multi-tiered installations
- Ideal for use with Gripple Pipe Bracket and QT Universal Clamp for piping suspensions

Supplied as ready-to-use kits with a length of cable, UniGrip Hanger, and end fixing of your choice.

Installation

UniGrip Foot Variants

The range of UniGrip ‘feet’ ensures the product suits all possible building service applications.

- **STANDARD**
  - *Ideal for:* Piping, rectangular ductwork, air conditioning units, electrical containment, heating and ventilation units, multi-tier applications.

- **CENTRAL EXIT**
  - *Ideal for:* Piping, rectangular ductwork, air conditioning units, electrical containment, heating and ventilation units, chilled beams, busbar, modules, multi-tier applications.

- **SIDE EXIT**
  - *Ideal for:* Suspended ceilings, heavy duty lighting, busbar, plenum boxes, single pipe runs.

- **HOOK**
  - *Ideal for:* Heating and ventilation units, heavy duty signage, cable basket/tray, radiant panels, chilled beams.

- **CALIBRA**
  - *Ideal for:* Radiant panels, chilled beams, heating, ventilation and cooling units.

- **CABLE BASKET ADAPTOR**
  - *Ideal for:* Cable basket and multi-tier installations.

- **Y-FIT**
  - *Ideal for:* Cable containment, signage, heating and cooling units, heavy duty lighting, radiant panels, chilled beams, balanced pipework, plenum boxes.

Supplied as ready-to-use kits with a length of cable, UniGrip Hanger, and end fixing of your choice.
Duct Trapeze Hanger

Ideal for fast suspension of rectangular ducting or similar services.

- Eliminates the need for a strut support
- Suitable for ducting made from 0.6 - 1.5 mm gauge steel
- Spreads the load across three fixing points
- Attaches with self-drilling screws or pop rivets (not provided)
- Optional rubber pad prevents air leakage and dampens vibration
- Release pin allows rapid height adjustment

Available in size No.2
Rubber Pad is Sold Separately

Supplied as ready-to-use kits with a length of cable, Duct Trapeze fastener and end fixing of your choice.

Butterfly Trapeze Hanger

Ideal for fast suspension of rectangular ducting or similar services that are hung close to the ceiling.

- Simple height adjustment using the integral pin prior to applying load
- Spreads the load across four fixing points
- Rubber pad prevents air leakage and dampens vibration
- Can be used for multi-tiered installations

Supplied as ready-to-use kits with a length of cable, Butterfly Trapeze fastener, and end fixing of your choice.

Installation

Release*

*When releasing: 1. Remove load, 2. Pull pin, 3. Raise or lower on cable

www.gripple.com
Fast Trak

Pre-fabricated rigid support solution offering speed, flexibility, and efficient use of space, for the installation of electrical containment, ductwork and other mechanical services.

- Safe: A pre-fabricated system which removes the need to cut threaded rod or channel on site
- Strong: 400 lbs with a 3:1 safety factor per system
- Quick: Up to six times faster to install than traditional suspension systems
- Adjustable: Bracket can be moved up and down the track without tools
- Secure: Safety lock off ensures security once bracket is in place
- Compatible: Two-point ceiling fixing using shot fire, drop in anchor or wedge
- Zero Waste Excess: Tracks bend neatly under bracket
- Space Saver: System can be 'stacked' on-site within a small area

Y-Fit & Y-Fit Accessory

Single point suspension at ceiling with two “leg” attachment points

- Ideal for light fixtures and cable baskets
- One leg can be detached to allow for cable installation
- Available with a range of end fixings for legs (Hooks, Toggles, etc.) and a variety of leg lengths
- Y-Accessory version available for use with another Gripple hanger; ideal for longer drops
- Use with standard Gripple Fastener or Express Fastener

Supplied as ready-to-use kits with a length of cable, Gripple fastener, and end fixings of your choice.

Cable Strut Kit & C-Clip Hanger

Create secure, overhead spans by running high strength cable between two fixed points. Ideal for applications where no direct vertical anchor point is available. The Gripple C-Clip, an innovative twist-on/off device, allows you to suspend from anywhere along the horizontal span.

- Visually discreet and lightweight
- Allows for suspension of services exactly where needed
- No tools needed to install
- Available in 1/8" and 1/4" cable diameters, for suspensions up to 220 lbs per span
- C-Clip End Fixing allows for horizontal and vertical adjustment
- C-Clip Cams lock solidly in place, even at angles up to 60°

Cable Strut Wall Brackets are available as a wall attachment point for the Cable Strut Kit using the code below.

For further product information please call 1 866 474 7753 or visit our website www.gripple.com.
Quick Twist Clamp

The Quick Twist Clamps are used in conjunction with Gripple Pipe Support Brackets for quick and easy support of all types of piping.

- Replaces 12 different pipe hanger sizes
- Suitable for all pipe sizes from ø 1/2" to ø 6" OD
- Improved insulation against vibration
- Quarter turn fixing to attach to Pipe Bracket - tool free attachment and adjustment
- Retractable, removable sleeve pre-fitted to cable to prevent galvanic corrosion
- Can be used over Calsil or Armafix insulation (also available)
- Spreader Band accessory available to distribute the weight of the suspended piping more evenly along the cable

Supplied in ready-to-use kits with Pipe Support Bracket sizes 1, 2, 3, or 4 ft.

Pipe Support Bracket

Pipe Support Brackets are supplied with Quick Twist Clamps for quick and easy support of piping.

- Quick and easy installation - Pipe Brackets are supplied with QT Clamps featuring quarter turn fixing
- Versatile - Can be bolted directly to soffit or wall, or suspended using threaded rod or Gripple UniGrip hangers
- Saves labor time - Eliminates the need for cutting channel on site, allowing more productive use of labor
- Improves health and safety - No tools required for installation
- Max load depends on bracket length and above or below mount configuration

Supplied as ready-to-use kits with up to (8) QT Clamps depending on Bracket length.

QT Compact Clamp

The Quick Twist Compact Clamps are used in conjunction with Low Profile Brackets for lower profile support of all types of piping.

- A lower profile than the QT Twist Clamp
- Up to 6 times faster than traditional methods
- Suitable for all pipe sizes from ø 1/2" to ø 6" OD
- Replaces 12 different pipe hanger sizes
- Quarter turn fixing to attach to pipe bracket - tool free attachment and adjustment
- Can be used over CalSil or Armafix insulation (also available)
- Improved insulation against vibration
- Spreader Band Accessory available to distribute the weight of the suspended piping more evenly along the cable

Supplied in ready-to-use kits with Low Profile Pipe Bracket sizes 1, 2, 3 or 4 ft.

Low Profile Pipe Bracket

Low Profile Pipe Brackets are supplied with Quick Twist Compact Clamps for lower profile support of piping.

- A lower profile version than the standard pipe bracket
- Quick and easy installation - Brackets are supplied with QT Compact Clamps featuring quarter turn fixing
- Versatile - Can be bolted directly to soffit or wall
- Saves labor time - Eliminates the need for cutting channel on site, allowing more productive use of labor
- Improves health and safety - No tools required for installation
- Max load depends on bracket length

Supplied in ready-to-use kits with up to (8) QT Compact Clamps.
Threaded Clamp

The 3/8” Threaded Clamp is engineered for hanging all types of piping within mechanical and plumbing services.

- Can be suspended from threaded rod or strut
- Suitable for all pipe sizes from ø 1/2” to ø 6” OD
- Replaces 12 different pipe hanger sizes
- Retractable, removable sleeve is pre-fitted to cable to prevent galvanic corrosion
- Improved insulation against vibration
- Also available as a pre-assembled strut attachment kit; includes a 2-inch length of threaded rod, a hex nut, and square washer
- Can be used over Calsil or Armafix insulation (also available)
- Spreader Band accessory available to distribute the weight of the suspended piping more evenly along the cable

Supplied individually or as part of a custom bracket system to suit your application.

**Loop**

- End Fixing that installs by a non-invasive, simple, choke knot technique
- Can be choked around a beam, bar joist, strut, or roof trusses
- Available for use with No. 1-5 Gripple fasteners. Refer to fastener load ratings and safety factors.
- Supplied as a ready-to-use kit with Gripple fastener and length of cable
- Available in lengths of 5 ft - 30 ft as standard
- Also available in Stainless Steel

**Installation**

Ensures a minimum 3” of tail wire exits the fastener.

Spreader Band
- Distributes the weight of the suspended service more evenly along the cable
- Snap to length as required; live hinges allow for flexibility of use
- Easily attaches to cable with integrated clips
- Ideal for use with insulation, fabric duct and bundled cable

Pipe Insulation Collars
- For use with all Gripple pipe clamps
- Universal - for mild steel, stainless steel, copper and plastic pipes
- High performance - reduced heat loss & highly moisture resistant
- Temperature range: Calss 20°F to +120°F
- Thermal conductivity: Calss 0.40 BTU · in/h · ft · °F

G-Bracket
- Made for supporting cable tray and basket

Tools & Finishing Accessories

Cable Cutters
- Hardened, durable jaws
- Two sizes available – pocket size for use up to 1/8” diameter cable, or larger, providing greater leverage for up to 1/4” diameter cable

Product code:
CUTTER-GRIPPLE
CUTTER-6MM

Release Keys
- Use for adjusting or releasing the Standard fastener (pre-load)
- Two sizes available – for Gripple hangers No.1, No.3 and Gripple hangers No.4, No.5 and Cable Strut kits. For D3 and D6 use No.1 - No.3 adjustment key.

Product code:
KEY-FLAG
(KEY for size No.1 to No.3)
KEY-HF45-LK
(KEY for size No.4, No.5 and Cable Strut)

Drop-In Anchor Setting Punch
- Leaves four permanent indents on the anchor to advise correct installation
- Ergonomic handle with hand protection
- Two sizes available to suit 1/4” & 3/8” anchor

Product code:
MAN-PUNCH-1/4
MAN-PUNCH-3/8

Protective Sleevings
- Protective black tubing to prevent contact between dissimilar metals or for aesthetic enhancement
- Ideal for use on No.2 & No.3 cable

Product code:
SLEEVE-2MM-FT
SLEEVE-3MM-FT

Wire Anchor Installation Tool
- Tool securely fits onto the wire anchor to hammer into place

Product code:
WIRE-ANCHOR-TOOL

Tensioning Tool
- Applies tension easily with the 6:1 gear drive mechanism
- Designed control mechanism to prevent over tensioning
- Compact, easy to handle, operate and carry
- For use with 1/4” Cable Strut kits

Product code:
TOOL-5-4BX-INC

Corner Saddle
- A right angled reinforced molding to prevent cable friction on rectangular ducting
- For use with No. 1-3 cable hanger

Product code:
CORNER-SADDLE

Twister
- Keeps tail wires neat and tidy
- Grey aesthetic finish - blends into background
- For use with No.2 and No.3 cable

Product code:
TWISTER-100BB

Overview of Technical Services Department Capabilities

Gripple is a manufacturer of Cable Hanger and Bracing Solutions for all types of suspended services, with our North American headquarters located in Aurora, Illinois, and other locations around the world in the UK, Europe, and India.

Gripple’s Technical Services Department is comprised of a dedicated and detail-oriented team of specialists who offer their technical services free of charge to contractors to assist in the bidding process. Simply put, Gripple’s Technical Services Department reviews the contractor’s drawings and provides the contractor with the recommended Gripple Cable Hanger or Bracing products and quantities for their project.

HVAC, Mechanical, Electrical, and MTO’s (Material Take Offs)

Gripple offers a variety of Cable Hanger products for suspending all types of HVAC, Mechanical, Piping, and Electrical services. No matter the service being suspended, or the type of structure you’re suspending from, Gripple has a solution.

By deciding to benefit from our complimentary Take Off services, the following process ensures that with little effort, your full project can be prepared for bidding:

1. Engineer/Contractor submits project drawings to your Gripple Territory Manager
2. Gripple Technical Team marks up the drawings with exact requirements (hanger type, spacings and quantity) for all services*
3. Gripple Technical Team generates concise Bill of Materials, and a “no obligation” quote is provided
4. Once order is placed, product is packaged and labelled to specific project requirements (e.g. Level Two, Zone One, Ductwork) to ensure ease of identification and use on-site
5. Product is dispatched to the job site, and installed accordingly by contractor

In addition to the above, your local Gripple Territory Manager can also provide supporting product submittal information and site visits upon commencement of the project.

* We provide our Take Off service for any and all required services on a project basis.

Cable Strut Take Offs

Gripple Cable Strut Kits create secure, overhead spans by running high strength cables horizontally between two attachment points. A C-Clip then twists and locks onto any point along the cable, offering a suspension point for a Gripple Cable Hanger, and giving complete control of horizontal and vertical positioning of the service being suspended. Installed substantially faster and adjusted considerably easier, Cable Strut systems can be used to hang all types of services in places that would otherwise be impossible.

The Gripple Technical Team can offer assistance and recommendations for installations being suspended on Cable Strut with regard to:

- Locations and length of the Cable Strut runs
- Safe Working Loads of the Cable Strut runs
- Intermediate support points
- Number of C-Clip Hangers that can be accommodated
- Expected sag

Seismic Bracing for Nonstructural Building Components

Gripple provides Seismic Risk Management. We take the liability issues away from you by providing a complete seismic solution – the risk management you need – that encompasses beginning-to-end Engineering services, as well as a full line of Seismic Bracing and Vibration Management products for use in seismic zones or AT/FP (Anti-Terrorism/Force Protection) situations.

The complex and technical nature of seismic bracing requirements, industry regulations, and life-safety issues necessitates a partner like Gripple. We begin by providing you with the following:

- Complimentary Budget Estimating – an all-inclusive estimate you can work into your budget that includes (where applicable) Seismic Cable Bracing, Vibration Management products, and Engineering Services.

Should you move ahead with Gripple on your seismic bracing project, we offer you the following Engineering services for an additional fee:

- PE Stamped Drawings - noting the proper location of Gripple Seismic Cable Bracing and Vibration Management products, per the scope of the project.
- BIM Modeling and Clash Detection - provided as required by design scope. Includes 2D, 3D, AutoCAD, and/or REVIT.
- Coordination and Site Reviews - with Structural Engineer and Gripple to ensure proper installation of Gripple products.

Contact your Gripple Territory Manager regarding Take Off services for your project!
Hanging at Angles

The load rating for a Gripple Hanger is based on the suspension being hung vertically. If the cable is at an angle, an additional sideways force is applied which increases the load on the suspension. The net effect is shown in the table below.

<table>
<thead>
<tr>
<th>Hanger size</th>
<th>Maximum load (lbs) at an angle from vertical</th>
</tr>
</thead>
<tbody>
<tr>

- All hangers are available in 5’, 10’, 15’, 20’ and 30’ standard lengths.
- Lengths rounded up to nearest 5 ft increment.
- Size of cable hanger (No.1 - No.5) will be based on weight of duct and hanger spacing.
- Allow spacing equal to 1/16” of duct diameter between the Gripple fastener and duct (Dim. A).
Pipe Support Spacing Data

Recommended minimum support spacing for pipe brackets and equivalent load per clamp when brackets are spaced as recommended:

### Usage Recommendations

Failure to comply with these recommendations may result in product malfunction and possible damage to property or person and will invalidate the Gripple guarantee. Gripple products are guaranteed to be free from defects in materials and workmanship in accordance with our terms and conditions. No other warranty, whether express or implied, including any warranty of merchantability or fitness for purpose shall exist in connection with the sale or use of any Gripple product.

Full technical information and installation instructions should be obtained directly from Gripple Inc., or via the website www.gripple.com.

Please adhere to the following usage recommendations:

- **Loads**
  - Always operate the product within its stated Safe Working Load range.

- **Lifting**
  - Do not use for lifting, either by crane or as part of a pulley system. Suspend static loads only.

- **Painting**
  - Do not paint the cable or fastener prior to installation. Ensure that the hanger is in its final position prior to applying any paint to the cable assembly. Do not move the fastener after painting.

- **Lubrication**
  - Do not apply oil or any other lubricant to the cable fastener, or any other part of the assembly.

- **Environment**
  - Do not use in chlorinated or chemically corrosive atmospheres. Standard hangers are for use in dry and air conditioned environments only. Stainless steel hangers should be considered for high to saturated humid environments after validation by a competent person. Not suitable for swimming pool environments.

- **Impact**
  - If there is potential for impact on the cable suspension or suspended services, seek advice from Gripple Technical Services prior to installation.

- **Hanging at an Angle to Vertical**
  - Ensure that the load calculation considers the effect of ‘side load’. For example, at an angle of 60° to vertical, the SWL is effectively reduced by 50%.

- **Joining**
  - Never join two ends together in-line.

- **Quality & Approvals**
  - Gripple UK is ISO 9001:2008 and ISO 14001 certified. Gripple products meet the highest standards of quality, with the lowest environmental impact. Gripple products hold the following approvals, certifications, and verifications:
    - bre
    - Chiltern
    - Intertek
    - TUV
    - ECA
    - Masterspec
    - Dw144

Gripple’s policy is one of continuous development and innovation. We therefore reserve the right to alter specifications, etc. without notice.
